

Project Overview: UDOT and Ralph L. Wadsworth Construction will extend Hinckley Drive (S.R. 79) westward from 1900 West (S.R. 126) to Midland Drive (S.R. 108). This extension will include a new bridge structure over the Union Pacific Railroad/Utah Transit Authority *Frontrunner* rail corridor, and a smaller one over the former Denver & Rio Grande Western railroad right-of-way trail.

The project will also include a new signalized intersection at Midland Drive and 3600 South in West Haven. The project will provide greater east-west mobility in the area, with a direct connection for residents of southwestern Weber County to Interstate 15.
